## Required Inspections – Electrical

Per the Virginia Construction Code Section 113.4, the minimum required inspections for the various types of work are listed below. However, this is a generic list and may not be applicable to, or inclusive of, all situations. For further clarification, please contact your inspector using the information listed on the next page.

Electrical Inspections	Trench/Bonding	Slab	Ceiling/Walls	Rough-In	Final
New Service/New Wiring-Commercial:	X	X	X	X	X
New Service/New Wiring-Residential:	X	X	X	X	X
Wiring for Pool	X				X
Subfed Panel	X				X
Panel/Meter Replacement or Relocation					X
Temporary Pole/Trailer Service					X

It is the permit holder's responsibility to supply a ladder or other means if access to the attic or roof is required to make the inspection. VCC Section 113.1.1

It is the permit holder's responsibility to schedule the required inspections at the appropriate stage of construction. VCC Section 113.1.2

### Scheduling Inspections

These inspections are scheduled through our online Accela Citizen Access system, a computerized system that allows contractors and homeowners to schedule inspections, cancel inspections, obtain inspection results, and obtain residential release information. This system is available 24 hours a day, 7 days a week. [www.vbgov.com/buildingpermits](http://www.vbgov.com/buildingpermits)

Inspections may be scheduled up to 5 working days in advance of the desired inspection date. However, inspections must be scheduled PRIOR to 7:00 am the day the inspection is desired. All requests after 7:00 am will not be available for a same day inspection.
